From

T G Rama Iyer, Esquire B A ,
Chairman City Improvement Trust Board,
Mysore

ml 69-28-3

To

The Chief Secretary
to the Government of His Highness the Maharaja
of Mysore

Sir

I have the honour to forward herewith an estimate amounting to Rs 20,000/- for removing silt from Doddakere Tank and for putting up an embankment for the formation of a road sanctioned by circulation among the Board of Trustees and to request that you may be so good as to obtain the early sanction of Government thereto

2 The report accompanying the plans and estimates in duplicate explains the nature and necessity for the work A copy of the memo circulated is also appended for reference

3 With a view to complete the work as early as practicable (under instructions received) the work is put in hand in anticipation of sanction

4 The cost of the work is proposed to be met by re-appropriation The actual opening balance of the Trust Board funds on 1st July 1928 is Rs 10 320/- more than the budgetted opening balance and the further balance required can be met from the contribution of Rs 10 000/- due to the Trust Board from the Municipality last year These are items not included in the Trust Board budget of 1928-1929 but which are available for expenditure

I have the honour to be
Sir
Your most obedient servant

T G Ramaiyer

Report to accompany the estimate for removing silt from Doddakere Tank and for putting up embankment for the formation of a road

5

Amount of estimate Rs 20 000/-

The water in the tank was very filthy emitting effensive smell With a view to abate this nuisance, the tank was completely drained off This only exposed black foul-smelling silt which had to be removed before allowing fresh water to accumulate The silt removal was also therefore taken up under instructions and with the sanction of the Trust Board

2 Advantage was also taken for putting up an embankment for the formation of a road in the bed to link up the Ittigegud southern most road with the Race Course road according to specifications received from the Palace Engineer This proposal results in a considerable savings in the cartage of silt, as it provides a place for dumping the silt at a short lead from the tank bed

3 The estimate for Rs 15,000/- for removing silt sanctioned by circulation was more or less approximate as the silt was too loose and miry at that stage to permit of accurate measurement The exact area of silt to be removed is now found out by an actual survey as the silt has now settled down as a thick strata and the estimate under submission is framed on the area so obtained taking an average depth of 1', the rate being based on the actual cost so far incurred during execution

Early sanction to the estimate is requested

A Ramachandra Rao
